**DETAILED ACTION**

Receipt is acknowledged of election and IDS file don 7/5/07 and 6/7/04.

***Election/Restrictions***

Applicant's election without traverse of group I in the reply filed on 7/5/07 is acknowledged.

Claims 13-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 7/5/07.

Applicant's election without traverse of species belonging to pearlizing agent and cationic component in the reply filed on 7/5/07 is acknowledged.

Claims 6-8, 10-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 7/5/07.

Claim 9 would be examined to the extent that it reads on the elected species drawn to Cetrimonium bromide and Cetrimonium chloride.

Claims 1-5, 9 and 18-26 are pending in the application and the status of the application is as follows:

***Information Disclosure Statement***

The foreign patents that are not in English has been considered to the extent that it reads on the abstracts only.

***Claim Rejections - 35 USC § 103***

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-5, 9 and 18-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over U. S. Patent 4,486, 334 ('334).

Patent '334 teaches aqueous dispersion of pearlescent agent using the claimed pearlizing agent. See the abstract and see col.4, ll 33-34 for ethylene glycol esters. Patent at col.3, ll 15-45 teaches that that the composition can have surfactants, which can be cationic, anionic. Patent at col.3, ll 3-5 teaches that the surfactant can be used individually or combination two kinds or more. See col.4, ll 10-25 for the concentration of pearlizing agent and surfactant. See col.5, ll 1-20 and see example 3. Patent under this example teaches the claimed pearlizing agent and claimed cationic surfactant, which is C16-18, monoalkyl trimethyl ammonium chloride. Cetrimonium chloride is C16 monoalkyl trimonium chloride. Patent under examples 1-2 teaches the combination of anionic surfactant and pearlizing agent.

Accordingly it would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare aqueous pearlizing concentrate using pearlizing agent, anionic

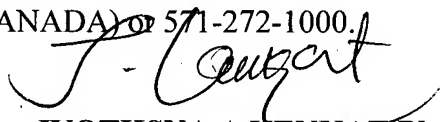

Art Unit: 1615

surfactant and cationic surfactant taught by patent that the pearlizing agent can be combined with one or more surfactants. This is prima facie case of obviousness.
